

Dr. Joao Pedra at the University of Maryland, School of Medicine is looking for a Junior Technician. The ideal candidate would have worked as an undergraduate/technician in a tick lab and is familiar with medical entomology/epidemiology/ecology studies.

He/She will be performing protective immunity/vaccination studies together with a senior technician and a research faculty member in my lab.

Additionally, he/she will have the opportunity to learn more about other projects/techniques in molecular biology, biochemistry, biophysics, microbiology, immunology and systems biology and interact with other members of the Pedra laboratory.

This type of position is ideal for someone with a B.S. degree looking for more research experience before applying for a PhD, MD, or MD/PhD program.
